Installing Sublime Text3

 \rightarrow GO TO NEXT

- Installing Sublime Text 3 in Windows
- Installing Sublime Text in Linux (Ubuntu)
- Installing Sublime Text in macOS (Apple)
- Verifying Installation

Your operating system can be either Windows or Linux.

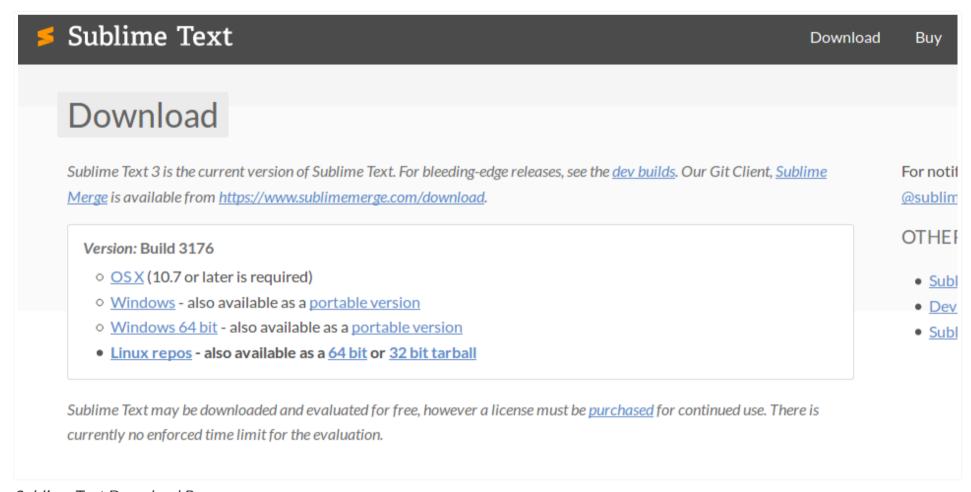

And depending on your operating system, the steps to install the software varies.

This chapter consists of instruction on how to install the software, based on your operating system. We recommend you to choose the appropriate method to install Sublime Text.

Installing Sublime Text 3 in Windows

[If your OS is Linux or macOS, please ignore this section]

- 1. Go to Sublime Text Website download page here at https://www.sublimetext.com/3
- 2. Download the Windows 64 bit version (or 32 bit if you are using 32 bit OS)
- 3. **Double Click** and choose '**Next**' and **Install** it.

Sublime Text Download Page

Installing Sublime Text in Linux (Ubuntu)

[If your OS is Windows or macOS, please ignore this section]

Installing Sublime Text in Ubuntu is very easy. All you need to do is run three commands.

Let me explain the steps in detail.

- 1. Open the Terminal by pressing Ctrl + Alt + T
- 2. Run the first command

```
sudo add-apt-repository ppa:webupd8team/sublime-text-3
```

COPY

```
sreenath@sreenathlenovo:~ $ sudo add-apt-repository ppa:webupd8team/sublime-text-3
Sublime Text 3 Installer: the package in this PPA downloads and installs the latest S

Get:8 http://in.archive.ubuntu.com/ubuntu bionic-updates InRelease [88.7 kB]

Hit:9 http://ppa.launchpad.net/ondrej/php/ubuntu bionic InRelease

Get:10 http://in.archive.ubuntu.com/ubuntu bionic-backports InRelease [74.6 kB]

Get:11 http://packages.microsoft.com/repos/vscode stable/main amd64 Packages [182
```

4. Run the third command

```
sudo apt-get install sublime-text-installer
```

COPY

```
Terminal

File Edit View Search Terminal Help

sreenath@sreenathlenovo:~ $ sudo apt-get install sublime-text-installer

Reading package lists... Done

Building dependency tree

Reading state information... Done
```

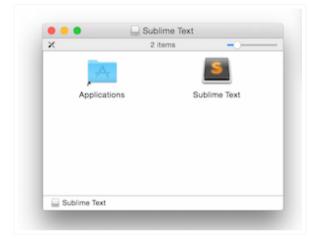

Running these three commands will install Sublime Text in your Ubuntu System.

Installing Sublime Text in macOS (Apple)

[If your OS is Windows or Linux, please ignore this section]

Installing Sublime Text in macOS is very easy. Let me explain the steps in detail.

- 1. Go to Sublime Text 3 website by clicking here https://www.sublimetext.com/3
- 2. Click on "OSX" link and it will download "Sublime Text Build 3211.dmg" file to your Downloads folder
- 3. Double click the file and install the software
- 4. After the installation you will see the following window

5. Drag the Sublime Text icon into the Applications icon to complete the installation procedure.

Verifying Installation

Once you have finished the installation, you need to verify the installation.

Follow the following steps to verify it.

- 1. Open Sublime Text
- 2. Type some text in Sublime Text
- 3. Save it to any location (eg: Desktop)
- 4. Open the saved file and make sure the contents are viewed correctly.

And this verifies your successful installaiton of Sublime Text 3
